PROJECTS

Library Management System | GitHub Jan' 26 – Feb' 26

- **Engineered** a system to manage **book records, user data, and issue/return workflows**, enhancing data organization and operational efficiency.
- Implemented key features such as **book search, issue/return tracking, and record management** using structured programming and strong logical problem-solving skills.
- **Architected** a **user-friendly interface** and applied **object-oriented programming principles** to build modular, scalable, and maintainable code.

Tech Stack *– Java, Object-Oriented Programming (OOP), File Handling*

Netflix Titles Dashboard | GitHub Jun'25 – Jul'25

- Analyzed Netflix's global content catalog with the objective of understanding patterns in genre distribution, release trends, ratings, and regional availability to support data-driven content insights.
- Explored and visualized the dataset through interactive dashboards, dynamic filters, KPI cards, and drilldown charts, highlighting differences between movies and TV shows, genre diversity, and country-wise content presence.
- Enabled clear insight discovery by presenting trends in content growth, viewer-oriented categories, and global expansion opportunities, helping users quickly interpret platform patterns and emerging strategic directions.

Tech Stack *– Tableau, MS Excel, Python, SQL*

SUMMER TRAINING

Lovely Professional University | LINK Jun'25 - Jul' 25

- Conducted comprehensive data extraction, cleaning, and preprocessing activities using SQL and Python, ensuring well-structured and high-quality datasets for further analytical workflows.
- Designed, developed, and refined interactive dashboards and visual analytics reports in Power BI and Tableau to present insights clearly and support data-driven decision-making.
- Utilized advanced Excel functions, pivot tables, data modeling features, and visualization tools to analyze large datasets, identify patterns, and communicate findings effectively.

Tech Stack *– Python, SQL, Tableau, Power BI and MS Excel*
